

SNF analytics, simplified.

Your complete Five-Star solution.

- ✓ **Quality:** Forecast your quality star rating and test scenarios with SimpleLTC's QM "what if" calculator. Easily spot opportunities with colorful alerts to help you increase star ratings and improve quality of care.
- ✓ **Survey:** Quickly identify high-risk residents using 100 risk indicators from each MDS assessment. Leverage clinical risk metrics for care planning, QAPI meetings, and staffing decisions.
- ✓ **Staffing:** No more stress about submitting a blind file or missing a deadline! Scrub PBJ files and submit directly to CMS. Predict Five-Star staffing ratings and forecast the impact of increasing a star.

Optimize reimbursement & outcomes, simply.

With SimpleLTC analytics, you can optimize clinical and financial outcomes for Five-Star, PDPM, readmissions, and more. Simplify MDS and PBJ workflow with pre-transmission scrubbing, direct submission, and post-validation analytics, all in one place.

More than 4,000 skilled nursing organizations trust SimpleLTC software to optimize reimbursement and clinical outcomes. With easy-to-use scrubbing and analytics from SimpleLTC, your team will be more efficient and able to focus on the results that matter most.

SIMPLELTC™

A BRIGGS HEALTHCARE COMPANY

Powerful, predictive analytics.

Optimize reimbursement.

PDPM

- ✓ Easily view and understand your PDPM data and its financial impact.
- ✓ Optimize your ICD-10 coding using the SimpleLTC Diagnosis Explorer.
- ✓ Run 5-day assessments through the PDPM Grouper to test reimbursement scenarios.

QRP

- ✓ See which facilities, residents and assessments are at risk of failing QRP requirements.
- ✓ Identify exact reasons for failing assessments, along with deadlines for correction.
- ✓ Take action to improve the QRP outcomes for at-risk facilities and residents.

State quality incentive programs

- ✓ Maximize state quality incentive payment performance for all your facilities.
- ✓ See state-specific metrics and spot opportunities for rapid improvement.
- ✓ Available for California, Florida, Ohio, and Texas.

Improve clinical outcomes.

Rehospitalization

- ✓ Gain insight into each resident's risk of rehospitalization.
- ✓ Improve quality of care and positively impact your VBP performance.
- ✓ Leverage SimpleLTC's machine learning capabilities to predict overall risk.

GG function scores

- ✓ Plan for successful discharge by identifying expected discharge scores.
- ✓ Monitor scores for each PPS stay as soon as the 5-Day is submitted.
- ✓ Identify gaps in Section GG coding practices or care planning that may impact QRP.

Frailty

- ✓ Identify the morbidity risks of residents across all your facilities.
- ✓ Leverage BIMS scores, mood assessments, functional status, and incidents of specific diseases.
- ✓ Compare average scores, 90th percentile and benchmarks against all SimpleLTC facilities.

Simplify PBJ reporting.

Assemble PBJ reports

- ✓ Import and convert all your source staffing files for PBJ reporting.
- ✓ Save your mapping for reuse next quarter.
- ✓ Easily add/update missing data & create an audit trail of changes.

Validate PBJ data

- ✓ Verify PBJ accuracy before submitting to CMS.
- ✓ Use our proprietary Error Checker to evaluate your PBJ data.
- ✓ Quickly resolve issues that might cause CMS to reject your file.

Predict Staffing Five-Star

- ✓ See what CMS sees before you submit your PBJ report.
- ✓ Predict your Staffing Five-Star ratings 3-5 months early.
- ✓ Run "what if" scenarios to test staffing level changes.
- ✓ Benchmark your PBJ results against other facilities.

Submit PBJ reports

- ✓ Create your PBJ XML file and submit to CMS with a single click.
- ✓ Get notifications of successful PBJ submission.
- ✓ Maintain your PBJ historical archive for easy auditing.
